

Low noise precision high voltage amplifier WMA-280

- High voltage 20.0x \pm 0.1% precision amplification up to +150V and -150V
 - DC to 100kHz full-power bandwidth and 300mA current
 - Ultra-low noise: 300 microVolts rms
-

High speed high voltage amplifier WMA-300

- High voltage 50x amplification up to +150V and -150V
 - DC to 5MHz full-power bandwidth and 300mA current
 - High slew rate: 2000V/us
-

High speed high voltage amplifier WMA-320

- High voltage 50x amplification up to +100V and -100V
- DC to 5MHz full-power bandwidth and 300mA current
- High slew rate: 1300V/us
